

Exhaust Purifiers

...for all types of industrial equipment

the
Solution
for a cleaner
working environment

DCL International Inc.

DCL International Inc.

DCL's goal has always been to be a world leader in the development and manufacturing of emission control products. To achieve this, DCL has assembled an expert staff of engineers and scientists, and equipped them with a leading edge research and testing facility. As a result of its commitment to superior quality and total customer satisfaction, DCL was chosen to supply equipment manufacturers such as Caterpillar, Nissan, Elphinstone and Melroe-Ingersoll Rand.

Employee protection

The health and safety of employees is extremely important. MINE-X® purifiers dramatically reduce the emissions of carbon monoxide, hydrocarbons, nitrogen oxides, and particulate matter. Removing these toxins eliminates the odor, eye irritation and headaches often experienced by employees exposed to engine exhaust. MINE-X® purifiers improve working conditions and help achieve compliance with strict government emission standards.

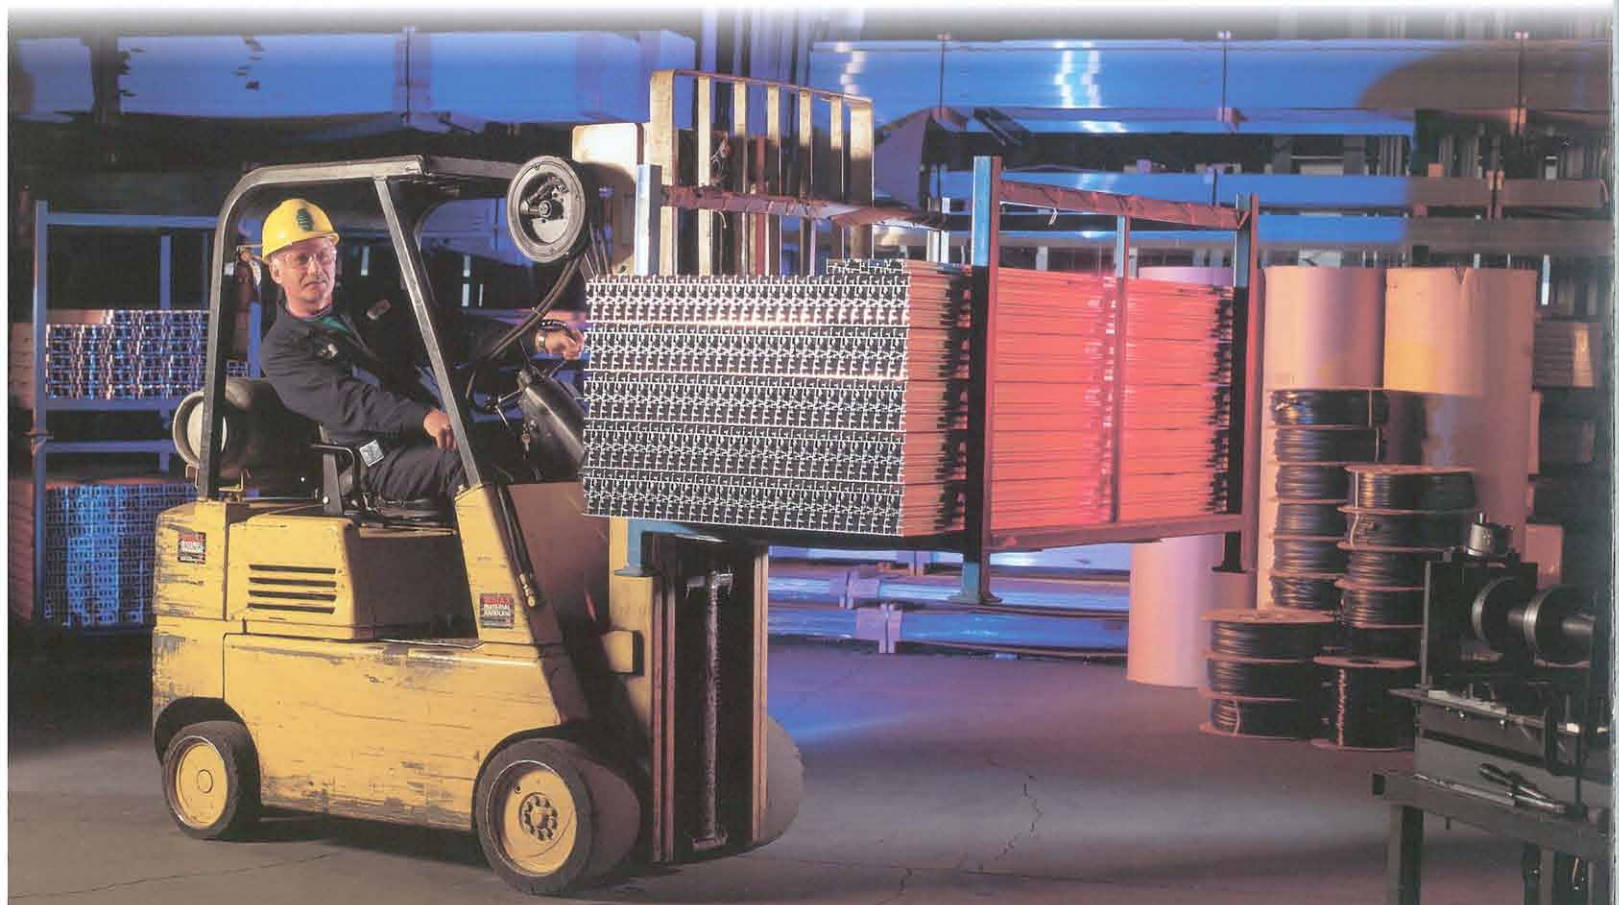

Savings

Drawing on more than a decade of experience, DCL has the ability to provide custom designed products and comprehensive customer service at the industry's most competitive prices. The benefit of increased employee comfort and productivity achieved with MINE-X® purifiers clearly makes them the most cost-effective way to improve exhaust emission quality.

"We have found that DCL has high technical standards and continues to invest in research to ensure that they remain a world leader in exhaust purification technology."

*Ed Mallett,
CEO and President,
Ontario Centre for
Environmental
Technology Advancement*

Exhaust Purifiers from DCL Inte

Your quick and easy solution

Quality

MINE-X® purifiers are designed to last. To ensure durability, DCL uses only the highest quality precious metal catalysts and heavy gauge or stainless steel housing materials. DCL continues to work on improvement and innovation by using both independent and in-house research and testing facilities. All MINE-X® products are backed by comprehensive product warranties.

"We appreciate your organization's commitment and support which is vital to taking quality to the next plateau and helping (Caterpillar) achieve our quality objectives."

*Neil Miller,
Senior Quality
System Engineer,
Caterpillar Inc.,
Aurora, Illinois, USA*

Service

As one of the first in the industry to combine metal fabricating and catalyst coating in one facility, DCL is able to handle any request quickly and efficiently. In addition to its manufacturing expertise, DCL provides full-time technical support, offering immediate solutions to most emission control problems.

Solutions

The direct-fit MINE-X® design enables DCL to provide quick and easy solutions to exhaust quality problems, whether it is a retrofit or factory installation. The product line includes oxidation and three-way catalysts, soot filters, and add-on silencers.

"By choosing DCL, we have associated ourselves with a company committed to providing superior product quality and service."

Industrial Hygienist,,
Homestake Mining Company,
Lead, South Dakota, USA*

International Inc. for diesel, propane

Mining and tunneling

For people who work underground, carbon monoxide, hydrocarbons and particulate matter pose serious health risks. MINE-X® purifiers clean dangerous exhausts, keeping employees safe and productive.

Material handling

The operation of a forklift in a warehouse can lead to a polluted working environment. MINE-X® purifiers eliminate hazardous engine exhaust and allow employees to breathe easier and work more productively.

Construction

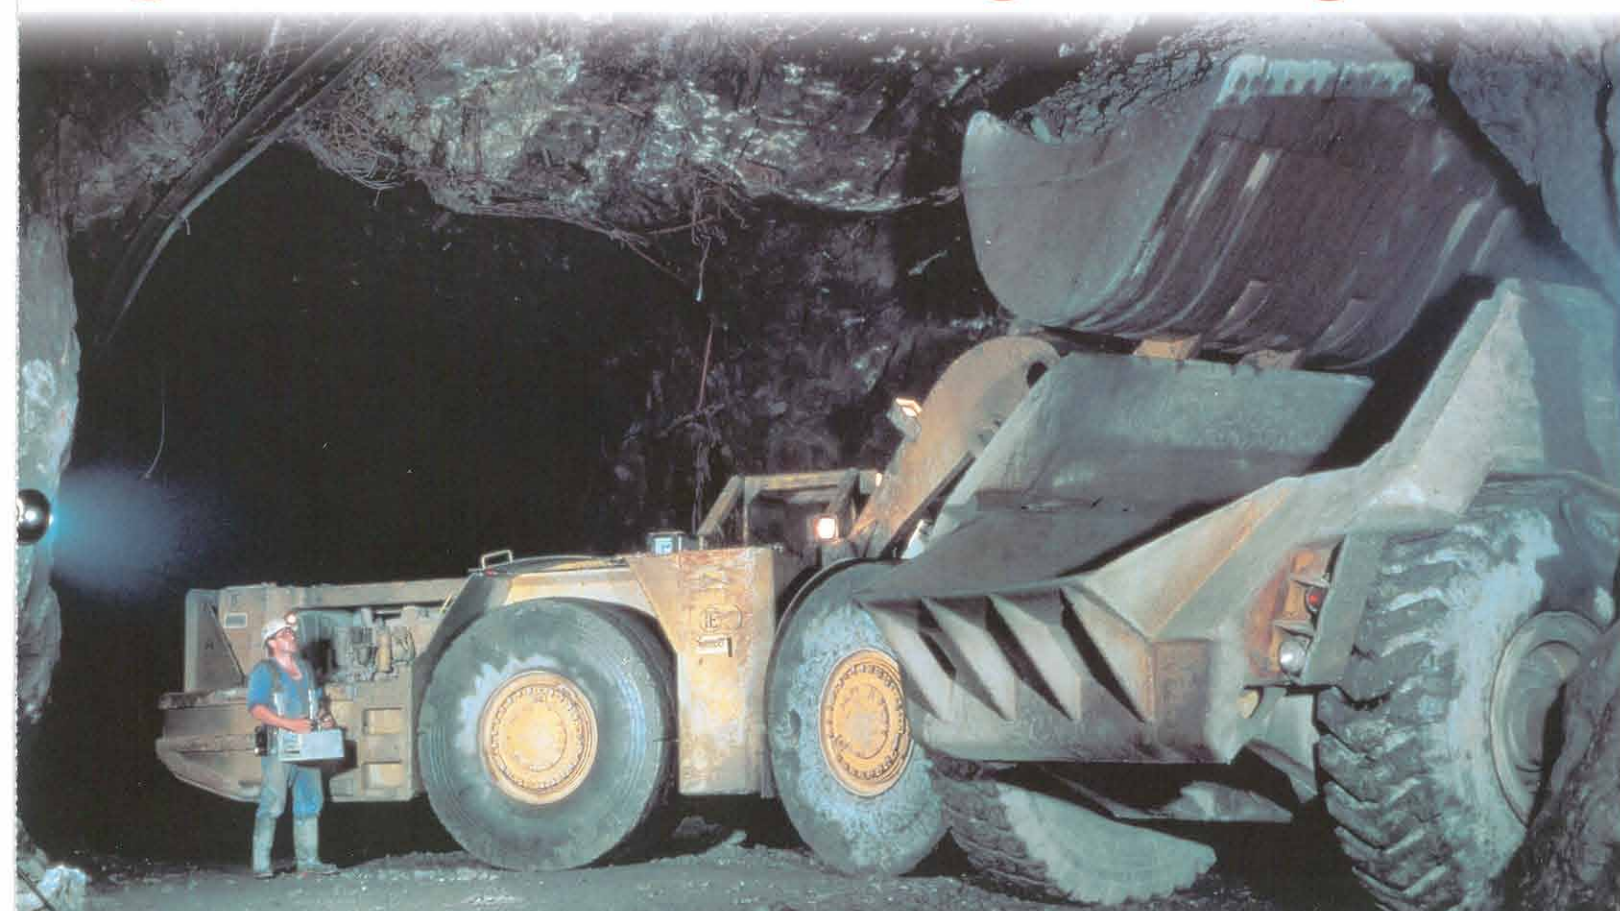

Around the world, construction occurs at many different sites. Keeping exhaust emissions clean ensures that employees stay on the job and that work is done quickly and efficiently.

Small engines

Engines come in many different sizes. No matter how small your engine is or what the application, DCL has a purification system to solve any emission control problem.
